

## Site Engineer - Solar Energy Projects

### Function description:

As site engineer you are responsible for the correct implementation and execution of commercial and industrial solar energy projects in Belgium and The Netherlands.

You are supporting the project manager and will ensure daily correct project execution on-site.

You are also responsible for the correct implementation of the health and safety aspects at the project site, in line with the applicable laws.

You are the central point of contact for our clients and contractors.

Because of your technical know-how and sense of quality and safety, you can avoid problems before they occur and ensure a correct and timely delivered project.

### Profile:

- Technical education A2 or Bachelor degree.
- Preferably a background in industrial electricity.
- Minimum 5 years' experience as site engineer.
- You can work independently and show a high level of maturity.
- You're not afraid to do some of the work yourself if needed.
- You are a strong communicator as well in written as in spoken language.
- You are Dutch (Flemish) speaking and fluent in English. Knowledge of French is a plus.
- You work out of the office in Schoten, near Antwerp, but spent most of your time on-site with our clients.
- You hold a valid driver's license type B.
- Preferably you have a VCA-VOL and BA5 certificate.

### Offer:

- A financial stable and international company in a dynamic growth sector.
- An experience in a company with respect for the environment and sustainable business ethics.
- An challenging and versatile function that allows room for entrepreneurship and initiative.
- A competitive salary package, including extra benefits.
